Subject Index

	Number-Page
Aerospace	
Cooler systems	1- 3
Interaction heating	2-75
Motion exciter	2-95
Transition performance	1-83
Analyzers	
Interferometric signal analysis	1-59
Biomedical	
Optical displacement measurement	4-73
Control	
Analytical design techniques	2-55
Bang-bang control	3-65
Computer control (breakpoint chlorination)	3- 3
Tensile properties	3-79
Data acquisition	
Digital	3-25
Integrated circuits	4-47
Energy	
Hot dry rock	1-49
Measurement and control	4-21
Oil shale	1-21
Pulverized coal-fired systems	1-29
Reduction of costs	4-81
Stress Transducers	1-69
Instrumentation	
Densitometers	1-37, 2- 3
Gas valves (high pressure)	4-65
Measurement of applied, residual stresses	2-33
Measurement of high temperature	2-11
Pseudonoise	2-21
Temperature (calculations of power cables	4- 7
Professional	
Evaluation, innovation	4-33
Laboratory procedures, maintenance	3-57
Sex difference in work attitudes	3-43
Worker motivation	3-37
Solar	
Color graphic controls	2-65
Laser ray trace tester	2-43
Temperature	
Gas thermometers	1-15
Optical fibers	4-55
Transducers	
Blood pressure	3-19
Optical vibration	1-65
Pressure	2-49
Spatial Averaging	3-49
Water and wastewater	
Process simulation (neutralization)	4-79
State and parameter estimation (sludge)	3-91

Title Index

Number 1 **Page**

NASA Low and Ultralow Temperature Cryogenic Cooler Systems for Space Missions 3
Small Gas Thermometer for Use at Low Temperatures 15
Oil Shale Processing Technology 21
Control Strategies for Pulverized Coal-Fired Systems 29
Mass Flow Measurements in Air/Water Mixtures Using Drag Devices and Gamma Densitometer 37
Hot Dry Rock, An Alternate Geothermal Energy Resource — a Challenge for Instrumentation 49
Advances in Interferometric Signal Analysis 59
An Optical Vibration Transducer 65
Solid Propellant Stress Transducer Evaluation 69
Comparative Transition Performance of Several Nosetip Materials as Defined by Ballistics-Range Testing 83

Number 2

Fluid Dynamic Measurements in Air/Water Mixture Using a Pitot Tube and Gamma Densitometer 3
Nonintrusive Density Distribution Measurement in Dynamic High-Temperature Systems 11
Fluidic Application of Pseudonoise in Dynamic Characterization of Instruments 21
Measurement of Applied and Residual Stresses Using an Ultrasonic Instrumentation System 33
Laser Ray Trace Tester for Parabolic Trough Solar Collectors 43
Fiber-Optic Coupled Pressure Transducer 49
Improving the Usability of Analytical Design Techniques in Industrial Control 55
Color Graphic Controls for the Solar Central Receiver Test Facility 65
The 60-MW Shuttle Interaction Heating Facility 75
A Subseismic Test Platform as a Motion Exciter 95

Title Index (cont.)

Number 3

Optimizing the Computer Control of Breakpoint Chlorination 3
Capacitative Blood Pressure Transducer 19
Principles of Digital Data Acquisition 25
Worker Motivation: Age Differences in Engineers 37
Sex Differences in the Work Attitudes of Professional Engineers 43
Deriving the Transducer Function of Spatial Averaging Transducers 49
Laboratory Procedures for the Maintenance of Evaluation Quality 57
Application of Comparison Theorems to the Computation of Bang-Bang Control of Nonlinear Systems 65
Computer Analysis of Tensile Properties of Textile Fibers and Fabrics 79
A Dynamic Model for State and Parameter Estimation of the Nitrifying Activated Sludge Process 91

Number 4

An Infrared System for Determining Ocular Position 3
An Instrument to Monitor Temperature and Calculate Ratings for Underground Power Cables 7
Energy Measurement and Control Using Density Meters and Microprocessors 21
Evaluation — How Can It Aid Innovation? 33
Integrated Circuit Implantable Systems 47
Measurement of Temperature with Optical Fibers 55
Development of a Noninvasive Acoustic Leak Detection System for Large High Pressure Gas Valves 65
Optical Displacement Measuring Device 73
Process Simulation of a Waste Neutralization Process 79
Steady State Feedforward Control Algorithms for Reducing Energy Costs in Distillation 89
